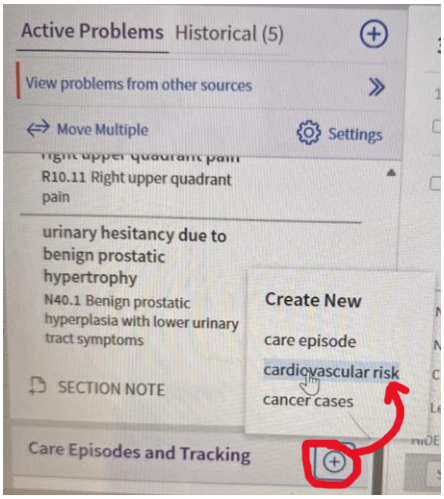
TENNESSEE CHARITABLE CARE NETWORK

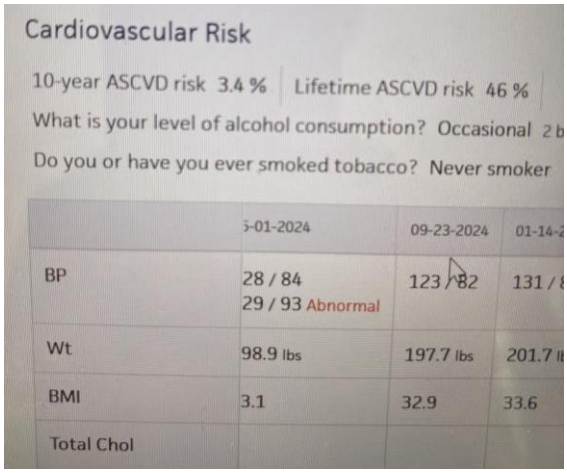
Athena ASCVD Embedded Calculator Cheat Sheet

This workflow will only be available if the required data components to calculate ASCVD risk are documented in reportable fields with correct units. See the O-Help article (User Guide-Flowsheets-Cardiovascular Risk) with details.

1. Go to Problems > Care Episodes and Tracking > Cardiovascular Risk



2. Click the 10-Year ASCVD Risk link to view the patient's risk scores and the values used to calculate the scores.



3. Select ASCVD risk category in the quality tab to fulfill the quality measure.
